Our Sauna Factory

Our Production starts with you, the client. From the moment you opened this catalog, you were invited in a realm where every detail is carefully crafted with you in mind. We understand that your needs and desires are as unique as you are, and that‘s precisely why we‘ve tailored our entire range of products to prioritize your health and well-being.

At Hanscraft, we‘re not just passionate about saunas – we‘re sauna enthusiasts through and through. Our team, dedicated to sauna design and production, is composed of individuals who share an unwavering love for these blissful havens. We‘ve turned our collective experience and knowledge into a powerhouse of sauna expertise.

Indulge.
Recharge.
Elevate.

Welcome to the extraordinary world of our saunas...

What is Thermowood?

Thermowood is a type of modified wood that has been heat-treated to improve its durability and stability. It is made by subjecting softwood, typically Scandinavian pine or spruce, to temperatures of 180–230 °C in a controlled environment with no oxygen. This process alters the chemical and physical properties of the wood, resulting in a material that is highly resistant to decay, moisture, fungi, insects, and weathering, deformation and making it less susceptible to shrinkage, warping, and cracking. Making it suitable for outdoor use without the need for additional treatments.

The main benefits of thermowood are its enhanced durability and stability, as well as its natural beauty. The heat treatment process eliminates most of the moisture and resin from the wood.

Thermowood is a popular material for sauna use, as it is resistant to the high humidity and temperature fluctuations that are typical of sauna environments. Sauna users also appreciate the natural beauty and warmth, which creates a cozy and inviting atmosphere.

Overall, thermowood is an excellent choice for anyone looking for a durable, stable, and beautiful wood material. This is a great investment into quality, durability, and beauty. Don‘t settle for less when it comes to your home. Choose thermowood and experience the difference for yourself!

THERMOWOOD ADVANTAGES

- Superior material longevity
- No warping or shrinking
- No resin leaks
- Resistant and durability
- Amazing smell
